

March 13, 2020

Press Release:

We would like to ensure that the residents of Jasper County are aware that the Jasper County Health Department is closely following the COVID-19 coronavirus. As of today, there are no known positive cases in our county. We are receiving updates from the Indiana State Department of Health and the CDC daily. Our message today is the best prevention is good hand washing, staying home if you have a cough and fever, and avoiding large gatherings. If you need to seek medical care and have any respiratory symptoms, please put a mask on immediately upon entering the facility. These should be available for your use. We will update our Facebook site as things progress in our area.

Dr. Marianne Nelson
